

Quality / Safety Policy

Aerokool Aviation Corporation's goal is to establish long-term relationships with our customers by providing superior products and services to the Defense and Commercial Aviation Industry by maintaining the highest level of commitment to customer service, material availability, quality and process improvement.

Safety is the first priority in all our activities. We are committed to implementing, developing and improving strategies, Quality and Safety Management Systems, and processes to ensure that all our aviation activities uphold the highest level of product, work place, and environmental safety.

Policy Objectives

1. Deliver exceptional Quality products and services.
2. Maintain relationships with suppliers that emphasize continuous improvement in product and service quality.
3. Provide employee education and training for optimal performance through Competency, Awareness, and Organizational Knowledge;
4. Monitor and maintain process controls for products and services identifying risks and opportunities.
5. We encourage safety reporting and ensure that no punitive action will result from reporting issues.
